

TOCHUKWU STANLEY AMAECHI

Data Analyst | Turning Data into Business Impact

Umule, Aba, Abia • +234 802 817 2849 • stanleyt619@gmail.com • linkedin.com/in/tochukwu-amaechi

PROFESSIONAL SUMMARY

Detail-oriented and curious Data Analyst with 3+ years of experience turning data into real business impact. Self-driven and proactive professional with strong SQL skills, advanced Excel proficiency, programming skills with Python, and expertise in BI tools (Power BI, Tableau). Proven ability to analyse data across projects, sales, and operations to build dashboards, track performance, identify inefficiencies, and deliver clear, actionable insights that drive decision-making. Track record of shaping operational effectiveness through data-driven recommendations that improve project efficiency, reduce costs, optimise sales performance, and enhance system reliability. Strong communicator skilled at collaborating with engineering, sales, and management teams to translate complex data into insights that directly influence real business decisions. Strong analytical mindset combined with the ability to identify opportunities for improvement and support strategic growth initiatives.

CORE COMPETENCIES

- Strong SQL Skills
- Advanced Excel
- Power BI & Tableau Expertise
- Dashboard & Report Building
- Performance Tracking & Analysis
- Actionable Insights Development
- Python Programming
- Cross-Functional Collaboration
- Strong Analytical Mindset
- Strong Communication

PROFESSIONAL EXPERIENCE

Data Analyst | De'Ican Tech Hub, Aba, Nigeria

August 2025 – Present

- Analyse data across projects, operations, and finance using SQL, Python, and advanced Excel to identify trends, patterns, and opportunities that drive business decisions
- Build dashboards and reports using Power BI to track performance metrics, operational efficiency, and key business indicators, achieving 80% success rate in implemented recommendations
- Identify inefficiencies and opportunities for improvement through detailed data analysis, directly influencing operational decisions that reduce costs and optimise resource allocation
- Support decision-making with clear, actionable insights by translating complex data into understandable recommendations for management and operational teams
- Collaborate with operations, finance, and management teams to understand business challenges and deliver data-driven solutions that shape how the organisation operates
- Turn data into actionable insights that improve project efficiency and optimise performance across multiple operational areas, demonstrating a detail-oriented and proactive approach
- Act as a self-driven analyst, independently managing analytical projects and proactively identifying areas where data insights can drive business growth and improvement

Data Analyst | Dinisoft Technologies (DSHub), Kaduna, Nigeria

July 2025 – September 2025

- Analysed operational data across healthcare service delivery projects using SQL and Python, identifying inefficiencies and improvement opportunities that enhanced system reliability

- Built dashboards and performance reports that tracked key operational metrics, supporting decision-making on resource optimisation and service delivery improvements
- Turned data into actionable insights that directly influenced operational decisions, improving project efficiency and reducing operational costs through data-driven recommendations
- Collaborated with cross-functional teams, including operations, technical, and management, to deliver analytical solutions that shaped operational strategies
- Demonstrated a strong analytical mindset by developing predictive models with 85% accuracy that supported proactive decision-making and operational planning

Data Analyst | Innovation Growth Hub, Aba, Nigeria

December 2023 – August 2025

- Analysed data across projects, sales (enrollment), and operations using SQL and advanced Excel, identifying patterns and opportunities that drove strategic program decisions
- Built dashboards and reports using Power BI and Tableau to track performance across multiple cohorts, providing clear visibility into operational and sales metrics
- Identified inefficiencies in program delivery processes and recommended improvements that optimised resource utilisation and enhanced operational effectiveness
- Supported decision-making with clear, actionable insights that shaped program expansion strategies, pricing models, and resource allocation decisions
- Collaborated with program management, operations, and marketing teams to deliver data-driven solutions that improved both sales performance and operational efficiency
- Demonstrated curiosity and detail-oriented approach by proactively exploring data to uncover hidden insights and improvement opportunities not explicitly requested
- Turned data into business impact by delivering insights that directly influenced operational decisions and contributed to measurable performance improvements

Data Analyst Intern | KPMG Australia (Virtual)

November 2023

- Analysed customer and sales data using SQL and advanced Excel, identifying opportunities for improving targeting efficiency and reducing marketing costs
- Built dashboards to track performance and communicate findings, turning complex data into clear insights that supported business decision-making
- Identified inefficiencies in marketing operations that resulted in significant cost reduction, demonstrating the ability to turn data analysis into real business impact
- Collaborated with project teams and communicated insights effectively, showcasing a strong analytical mindset and communication skills

Data Analyst Intern | PwC Switzerland (Virtual)

August 2023

- Analysed operational and HR data using SQL and advanced Excel across 3 datasets, identifying cost-saving opportunities and operational inefficiencies
- Built Power BI dashboards to track performance and present insights to stakeholders, demonstrating ability to turn data into actionable business recommendations
- Supported decision-making by delivering clear insights that influenced strategic initiatives and operational improvements
- Collaborated with engagement teams, showcasing a self-driven approach and strong communication skills in presenting complex analytical findings

TECHNICAL SKILLS

- **SQL (Strong):** Complex queries, joins, aggregations, subqueries, CTEs, data extraction and analysis, database querying across projects and operations
- **Excel (Advanced):** Power Query, Pivot Tables, VLOOKUP/XLOOKUP, INDEX-MATCH, advanced formulas, data modelling, statistical analysis, complex data manipulation
- **BI Tools:** Power BI (DAX, dashboards, performance tracking), Tableau (visualisations, reporting), Looker-compatible skills
- **Additional Tools:** Python (pandas, numpy, matplotlib, seaborn, scikit-learn, NLP, prediction modelling, statistical analysis), Google Sheets, Microsoft Office Suite
- **Analytical Capabilities:** Performance tracking, efficiency identification, trend analysis, opportunity identification, cost optimisation, operational analysis, sales analysis

EDUCATION

Master of Science (M.Sc.) in Analytical Chemistry

University of Ibadan • 2018

Developed a strong analytical mindset, quantitative analysis expertise, and a detail-oriented approach to problem-solving

Bachelor of Science (B.Sc.) in Chemistry

University of Ibadan • 2014

Built a foundation in data analysis, systematic thinking, and curiosity-driven investigation

PROFESSIONAL CERTIFICATIONS

- DataCamp Professional Data Scientist Certification
- Google Certified Educator Level 1
- Data Science Foundations - Greater Learning (2023)
- Data Analytics Essentials - Cisco
- 2024 DSN AI Bootcamp - Data Science Nigeria (2024)

WHO I AM - KEY ATTRIBUTES

- **Detail-Oriented and Curious:** Meticulous approach to data analysis with natural curiosity that drives me to explore beyond surface-level findings and uncover hidden insights and improvement opportunities
- **Self-Driven and Proactive:** Take initiative in identifying analytical opportunities and delivering solutions independently without waiting to be asked, demonstrated through 80% success rate in implemented recommendations
- **Able to Turn Data into Actionable Insights:** Proven ability to transform complex datasets into clear, actionable recommendations that directly influence business decisions and drive real operational impact
- **Strong Communicator:** Excellent ability to present complex analytical findings clearly to technical and non-technical stakeholders, ensuring insights are understood and actionable across all organisational levels
- **Strong Analytical Mindset:** Deep analytical thinking capabilities demonstrated through the identification of inefficiencies, development of predictive models, and delivery of insights that shape operational strategies
- **Business Impact Focus:** Not just analysing data—focused on shaping how organisations operate through insights that improve project efficiency, reduce costs, optimise sales performance, and enhance system reliability

PROFESSIONAL DEVELOPMENT

- Executive Committee Member, Data Science Nigeria (DSN) - Aba Chapter
- Continuously engaged in learning emerging analytical techniques and industry best practices
